[Footnote 1] Please note that the Scotland-level life expectancy estimate shown here is for use only as a comparator for the corresponding sub-Scotland-level figures. The definitive Scotland-level life expectancy estimate (based on interim life tables) is published by the Office for National Statistics:

National Statistics Online - Interim Life tables

Note: This abridged life table is constructed from the estimated population in 2008, 2009 and 2010 and the total number of deaths registered in these years. The column headed I_x shows the numbers who would survive to the exact age of x out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2008-2010. Column e_x shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2008-2010 mortality probabilities from age x onwards.
